Cloud-focused Software Engineer with hands-on experience designing backend services, AWS infrastructure, CI/CD pipelines and observability platforms. Experienced with Docker, Kubernetes, Terraform, GitHub Actions, Prometheus, Grafana, ELK Stack and production AWS services including Lambda, API Gateway, Aurora, Cognito, SNS, SQS and SES. Currently building production-inspired DevOps projects focused on Kubernetes, GitOps and Infrastructure as Code while growing toward Cloud and Platform Engineering.

PROFESSIONAL EXPERIENCE

MobyDyg

Software Engineer – Cloud & Backend

Remote

July 2024 - Present

- Work daily with AWS services including Lambda, S3, Cognito, API Gateway, Aurora, CloudWatch, SNS, SQS, and SES to support and improve cloud-based applications.
- Build and maintain backend services and database integrations based on product and business needs.
- Use Docker and Linux-based workflows for development, deployment, and troubleshooting.
- Apply infrastructure automation practices with Terraform to manage and provision cloud resources.
- Improve software delivery and security processes using Trivy, Dependabot, and release automation tools such as release-please.
- Designed and deployed event-driven serverless architectures using Lambda, SNS/SQS, EventBridge, and API Gateway to support high-concurrency workloads.
- Built and deployed a complete appointments & sessions platform end-to-end, integrating third-party services including Infobip, Chatwoot, and Timekit.
- Reduced page load times from 15–17s to under 3s through lazy-loading strategies, skeleton screens, and bundle optimization.
- Collaborate across application, infrastructure, and product concerns, contributing to backend, database, and cloud-related work.

TECHNICAL SKILLS

- Cloud Infrastructure: AWS (Lambda, S3, Cognito, API Gateway, SNS, SQS, Aurora, SES, CloudWatch)
- Infrastructure as Code: Terraform, Linux, Bash
- Containerization: Docker, Kubernetes
- Monitoring & Alerting: Prometheus, Grafana, ELK Stack, Alertmanager
- CI/CD Pipeline: GitHub Actions, GitLab CI, Trivy, Dependabot
- Backend: [Node](#), Go, C#, TypeScript, PostgreSQL, Redis

EDUCATION

Full Stack Web Development Bootcamp Academia-X | Remote Jan 2023 – Feb 2024

LANGUAGES

- Spanish — Native
- English — Working proficiency
