DevOps- and cloud-focused Software Engineer with hands-on experience in backend development, infrastructure automation, CI/CD, observability, and AWS-based systems. Strong background building and integrating scalable applications using Go, C#, Node.js, TypeScript, PostgreSQL, and AWS services such as Lambda, API Gateway, S3, Cognito, SNS, SQS, Aurora, SES, and CloudWatch. Experienced with Docker, Terraform, Linux, GitHub Actions, GitLab CI, Prometheus, Grafana, ELK Stack, Alertmanager, Trivy, Dependabot, and release automation. Comfortable working across backend, databases, integrations, cloud services, and operational tooling, with a strong focus on DevOps, Cloud, and Platform Engineering.

PROFESSIONAL EXPERIENCE

Mobydyg

Software Engineer

Remote

July 2025 - Present

- Work daily with AWS services including Lambda, S3, Cognito, API Gateway, Aurora, CloudWatch, SNS, SQS, and SES to support and improve cloud-based applications.
- Build and maintain backend services, database integrations, and frontend features based on product and business needs.
- Use Docker and Linux-based workflows for development, deployment, and troubleshooting.
- Apply infrastructure automation practices with Terraform to manage and provision cloud resources.
- Improve software delivery and security processes using Trivy, Dependabot, and release automation tools such as release-please.
- Create and maintain integrations with external platforms such as Infobip, Chatwoot, and Timekit.
- Build and support event-driven and API-based workflows using SNS, SQS, Lambda, API Gateway, webhooks, and Aurora.
- Collaborate across application, infrastructure, and product concerns, contributing to backend, database, frontend, and cloud-related work.

TECHNICAL SKILLS

- AWS: Lambda, S3, Cognito, API Gateway, SNS, SQS, Aurora, SES, CloudWatch
- DevOps: Docker, Terraform, Linux, GitHub Actions, GitLab CI, Trivy, Dependabot, release-please
- Observability: Prometheus, Grafana, ELK Stack, Alertmanager
- Backend: C#, Go, Node.js, TypeScript, PostgreSQL, REST APIs, Webhooks

EDUCATION

Full Stack Web Development Bootcamp

Academia-X | Remote

Jan 2023 – Feb 2024

LANGUAGES

- Spanish — Native
- English — Working proficiency
